THE HISTORY OF THE UNITED STATES OF AMERICA  
FROM 1763 TO 1876  
BY CHARLES A. BEAMAN  
VOLUME I  
CHAPTER I  
THE EARLY YEARS  
1763-1776  
The year 1763 marked the end of the Seven Years' War, which had been fought between Great Britain and France for the control of North America. The British emerged as the victors, and the Treaty of Paris was signed, recognizing British sovereignty over the eastern half of the continent. This event set the stage for the American Revolution, which would begin in 1776.

The early years of the United States were characterized by a period of rapid growth and expansion. The population of the colonies had increased significantly, and the economy was becoming more diversified. The American people were developing a sense of identity and independence from British rule. The American Revolution was a struggle for self-determination and the establishment of a new government based on the principles of liberty and justice for all.

The American Revolution was a turning point in the history of the United States. It led to the creation of a new nation, the United States of America, and the establishment of a new form of government. The American people were able to secure their independence from British rule and to create a new society based on the principles of liberty and justice for all.
